
Perimeter

perimeter - maths resources - perimeter. perimeter is the distance around a two-dimensional shape. example: the perimeter of this rectangle is $7+3+7+3 = 20$. example: the perimeter of this regular pentagon is: $3+3+3+3+3 = 5 \times 3 = 15$

understanding it perimeter security - the perimeter is now becoming fuzzy. any sort of computing device may become the perimeter itself, and these devices in many cases are mobile. this introduces us to a new concept. if the network perimeter has eroded, then what is the perimeter? the network perimeter has become a dynamic changing barrier that you must redefine and protect.
