
Redox Reactions Lab Report

lab 10: redox reactions - michigan state university - this week in lab you will examine a few different types of redox reactions, including making a series of electrochemical cells and performing a couple of small redox reactions. procedure work in partners for this lab. note that you may do the sections in any order that you wish. part i-making electrochemical cells **experiment 8 redox titrations - los angeles harbor college** - experiment 8 - redox titrations potassium permanganate, kmno_4 , is a strong oxidizing agent. permanganate, mno_4^- , is an intense dark purple color. reduction of purple permanganate ion to the colorless mn^{2+} ion, the solution will turn from dark purple to a faint pink color at the equivalence point. **experiment 9 electrochemistry i - galvanic cell** - 9-1 experiment 9 electrochemistry i - galvanic cell introduction: chemical reactions involving the transfer of electrons from one reactant to another are called oxidation-reduction reactions or redox reactions. a redox reaction, two half-reactions occur; one reactant gives up electrons (undergoes oxidation) and another reactant gains electrons (undergoes reduction). **determination of the stoichiometry of a redox reaction** - determination of the stoichiometry of a redox reaction pre-lab assignment: reading: section 4.4 - 4.6 and 20.1-20.2 in brown, lemay, bursten, and murphy. 1. balance the following reactions: (getting these right will save you a lot of time later!)
